Restore Your

# HAIRLINE

## NEW NO SHAVE TECHNIQUE

As we age our hairline naturally retraces higher. Bodyline's No Shave, No Scar FUI Technique will have your hairline looking better than ever without any unseemly scars, undercuts and shaven areas.

### FUI = FUE + DHI

Introducing the cutting-edge advancement in Hair Restoration techniques: FUI. This remarkable innovation combines the prominent No Scar extraction technique of FUE (Follicular Unit Extraction) with the unparalleled precision follicle placement of DHI (Direct Hair Implantation). Say goodbye to scars and hello to flawless results with FUI, the ultimate solution for restoring your hair to its former glory.

# Long Hair FUI: A Revolution in Hair Procedures

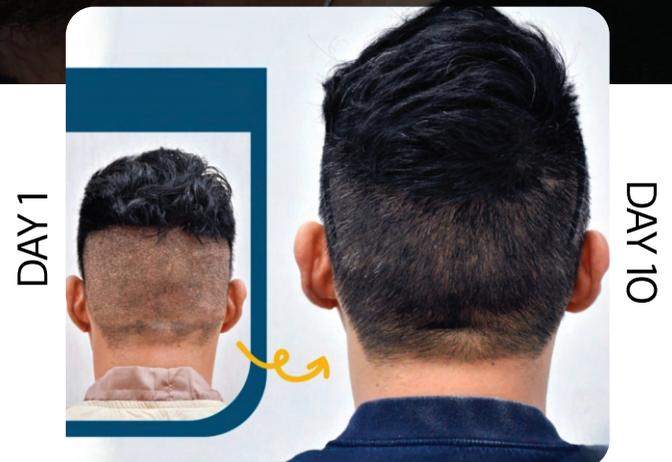

A Long Hair FUI transplant is a groundbreaking procedure that offers a permanent solution for you to restore your hair without sacrificing its length. Using a state-of-the-art custom built tool, your hair follicles are delicately extracted, ensuring the growth of healthy cells while preserving the full

length of your hair. This revolutionary technique not only delivers ultra fast results but also effectively conceals the donor area, leaving you with a natural, seamless outcome. If you're experiencing thinning hair and longing for a swift recovery, this procedure is the perfect solution for you.

## LONG HAIR FUI NO SHAVE EXTRACTION

## TRADITIONAL FUI UNDERCUT or SHAVED

## Benefits of Long Hair FUI Procedures

Long Hair or Unshaven FUI (abbreviated as U-FUI) has several benefits over traditional shaven FUI:

- 1. Swift Return to Normal Activities:** With unshaven FUI, you can return to your normal activities quickly as most people won't notice you've had surgery.
- 2. Maintain Your Original Hairstyle:** Your original hairstyle can be maintained as your existing hair is kept at its regular length.
- 3. No Shaving Required:** Non-shave FUI is a 'long hair' procedure that does not call for shaving any part of the head prior to the treatment. This
- 4. Ideal for a Busy Lifestyle:** With virtually no downtime, it is ideal for a typical busy lifestyle.
- 5. Precise Harvesting Control:** The long hair technique allows the surgeon precise control of how much to harvest from the donor area, avoiding overharvesting.

These benefits make Long Hair or Unshaven FUI an attractive option for many individuals considering a hair transplant.

## Customer Services Included

*Experience the ultimate peace of mind with Bodyline's exceptional services in Thailand. Our dedicated Aussie staff have been on the ground since November 2003, ensuring you receive unparalleled support from the moment you arrive in Bangkok until the moment you leave. We take care of everything, from airport transfers to hotel booking, and even accompanying you to all medical consultations and procedures. With Bodyline, you can rest assured that you're in good hands.*

At no extra cost, our valued customers receive a comprehensive range of services that include:

### 1. **Bangkok Airport Arrival:**

You will be welcomed at Bangkok Airport by a porter holding a sign with your name, assistance with your luggage, and a direct transfer to your hotel. A Bodyline staff member will be waiting in the lobby to help you with check-in and provide updates on your medical consultation.

### 2. **Consultation:**

We will escort you to the clinic for your consultation, assist with registration, and accompany you to your surgery consultation. When finished we will transfer you back to your hotel and schedule your procedure day pick-up time.

### 3. **Procedure Day:**

On the day of your procedure, we will meet you in the lobby and transfer you to the clinic/hospital.

### 4. **Post Procedure:**

Once you have completed 'recovery', we will escort you back to your hotel and provide any emotional or physical support you may need at this time.

### 5. **Follow-up Appointments:**

Bodyline will also transfer you to your follow-up consultations and scalp cleanse, which are included in your package.

### 6. **Checkout and Transfer to Airport:**

On your final day, we will meet you at check-out and provide a transfer to the airport.

### 7. **In Australia:**

Approximately 2 weeks after your return, Bodyline will reach out to ensure your smooth transition back home. At this time, our dedicated team will carefully plan and coordinate a convenient schedule and clinic location for your PRP treatments with the esteemed **Dr Zac Turner**.

Trust us to take care of all your needs during your medical journey.

# PROCESS

# Our Work

## The Case of Ploy

After experiencing a devastating house fire, Ploy suffered severe burns to her hair and face. The extent of the damage was such that her hair was burned down to the root, leaving her unable to regrow it. Fortunately, Dr. Nuttorn intervened and the outcome has been life changing. **Ploy has finished stage 1 of a 3 stage process.**

## Casey's Hairline Rejuvenation

Casey's luscious locks had always been her pride, but as the years went by, she couldn't help but notice her hairline receding at the temples. Determined to reclaim her hairline, she embarked on a transformative journey with a long hair FUI procedure. Within 12 months, Casey's hairline had been restored.

## Steven's Transformation

Steven had never given much thought to a Hair procedure, but fate had other plans for him during his trip to Thailand for an eye lift. Curiosity got the better of him, and he inquired. In no time, Steven was undergoing the procedure, and the outcome was nothing short of extraordinary.

# Dr Zac Turner's FUI Procedure transformed his hairline!

Dr Zac Turner travelled to Thailand for 2,500 Grafts / 6,000 hairs.

## “ In Dr Zac's words

*"...I was so happy with the outcome that I went into partnership with Bodyline offering follow-up treatments and support for returning hair clients..."*

*"...To have this same procedure in Australia was going to be triple the price and from what I learned about the Doctors I used in Thailand, having been certified by the 'American Board of Hair Restoration Surgery' and 'London Hair Restoration Training Academy', I knew that a Surgeon of this quality would be more like 3 or 4 times the price in Australia."*

Before

After

## 2 x PRP treatments with Dr Zac Free with all Bodyline FUI Procedures

All Bodyline FUI Procedure clients receive 2 free PRP treatments and follow-up with Dr Zac in his clinics in Brisbane, Gold Coast, Sydney, ACT

Procedure performed locally in Australia?	✗	✓
Pre & Post Procedure care in Australia	✓	✓
All Transfers between your Accommodation and Hospital/Clinic	✓	✗
Total procedure cost	<b>\$6000 – \$10,000</b>	<b>\$16,000 – \$24,000</b>

Included for *No Extra Cost*

# Bonus Treatments

Normally \$1350

## ALMI Nanofat Transfer

ALMI Nanofat Transfer is a groundbreaking therapy that stimulates hair growth. Utilizing a unique technique, a small amount of fat is extracted from your thigh and processed to create a potent suspension of stem cells and tiny fat cells. This powerful solution is then painlessly injected into your scalp, reinvigorating dormant hair follicles and promoting the growth of new, healthy hair.

Normally \$500

## Platelet Rich Plasma (PRP)

PRP therapy is a type of regenerative medicine that uses a patient's own blood plasma to promote healing and tissue repair. PRP is highly effective in stimulating new hair growth. The procedure involves drawing a small amount of blood from the patient and spinning it in a centrifuge to separate the plasma from the red and white blood cells. The plasma is then enriched with platelets and injected into the scalp.

Normally \$300

## 6 Months Medication and Hair Wash Serum

Dr Nuttorn's proprietary Hair Medication is recommended to be taken after a hair procedure. When combined with a FUI Hair procedure, trials with patients have shown a significant improvement in hair growth and a decrease in hair loss. Histologically, there was an observed increase in follicle size and the percentage of anagen follicles.

Normally \$1000

## 2 x PRP in Australia with Dr Zac Turner

All Bodyline customers received 2 x PRP sessions with Dr Zac Turner in your choice of his Sydney, ACT, Gold Coast, Brisbane or Sunshine Coast locations. This treatment will be organised by the Bodyline team in Australia with your clinic of choice approximately 2 weeks after your arrival in Australis. Upon your treatment and consultation Dr Zac Turner will be available for further consultation exclusively for all Bodyline patients.

# Frequently Asked *Questions*

**What is the difference between a FUI, FUE, FUT, DHI procedure?**

The most common hair transplant procedure is FUE, which involves removing individual hair follicles from the donor area and transplanting them to the balding area. This procedure does not leave any linear scars.

FUT is an older method that involves removing a strip of skin from the donor area and extracting hair grafts from it. This method does leave a linear scar.

DHI is a newer procedure similar to FUE, but it uses a special pen-shaped tool to implant the hair follicles. This technique aims to reduce trauma to the follicles and improve the overall results.

Lastly, FUI is the newest technique that combines the FUE follicle harvesting method with the DHI Implanter Pen. This combination allows for better results and efficiency during the implant phase, while also avoiding scarring.

The success rate for FUI procedures is over 93%.

If you look after your hair, then the results will last the remainder of your life.

The implanted hair will take 3 to 4 months to start growing. It will reach full length in the period of 9-12 months after your procedure.

An FUI procedure takes 4 to 6 hours to complete.

A local anaesthetic will be used during your procedure. If you desire to be asleep there is the option of hospitalisation and general anaesthetic. This will require a minimum of 1 night stay in hospital and will incur an extra fee.

With the use of anaesthesia discomfort during the procedure is eliminated.

To discover if you are a suitable candidate please take photos of the top, back and sides of your head and send them to our team.

After the procedure, swelling may be apparent but can be reduced with medication. It's normal to experience crusting or small scabs for up to ten days, as well as some itching at the treatment sites. Any numbness at the donor or recipient sites typically goes away within a few weeks.

Patients can usually go back to work after 48 hours, but should avoid strenuous activity for 5 to 7 days. Hair should be washed each morning after the procedure. While you are in Bangkok the Clinic will handle this for you.

3 nights / 4 days is enough time for consult, procedure(s) and follow-up.

**What are my chances of success?**

**How long will the results last?**

**How long will it take for my implanted hair to grow?**

**How many hours does a FUI procedure take?**

**What kind of anaesthetic is used? Will I be awake or asleep for the procedure?**

**Is the procedure painful?**

**How do I know if I am a suitable candidate for a FUI procedure?**

**What will my recovery be like?**

**How long do I need to be in Thailand for my FUI procedure?**

# Our Hotel
